Review recommended

#F9A825

Critical

Immediate action required

#D32F2F

Usage: These colors appear only on health scores, status badges, and alert indicators — never for buttons, headers, or decorative elements.

03 — TYPOGRAPHY

Type System

Friendly and readable. Georgia for warmth, Arial for clarity.

DISPLAY FONT

Georgia

Headlines, scores, key metrics

BODY FONT

Arial

Body text, labels, UI elements

TYPE SCALE

H1 / 32pt

Your Business Health

H2 / 24pt

Cash Position

H3 / 18pt

Weekly Summary

Body / 14pt

Your profit dropped this month because labor costs went up.

Small / 12pt

Last updated 2 hours ago

Buttons & Inputs

Orange for actions. Generous touch targets, soft corners.

BUTTONS

Primary Action

Main CTAs, confirmations

Secondary Action

Design Philosophy

Every design decision flows from these guiding principles.

01

Warm, Not Corporate

This isn't cold accounting software. It's a trusted advisor. Every element should feel approachable.

02

Plain English Always

No jargon. No accountant-speak. If a 12-year-old can't understand it, rewrite it.

03

Clarity Over Clutter

Every element earns its place. White space isn't empty—it's breathing room.

04

Traffic Light Clarity

Green, amber, red. At a glance, users know if they're healthy or have a problem.

05

Mobile-First Always

Business owners are busy. Every screen must work beautifully on a phone first.

06

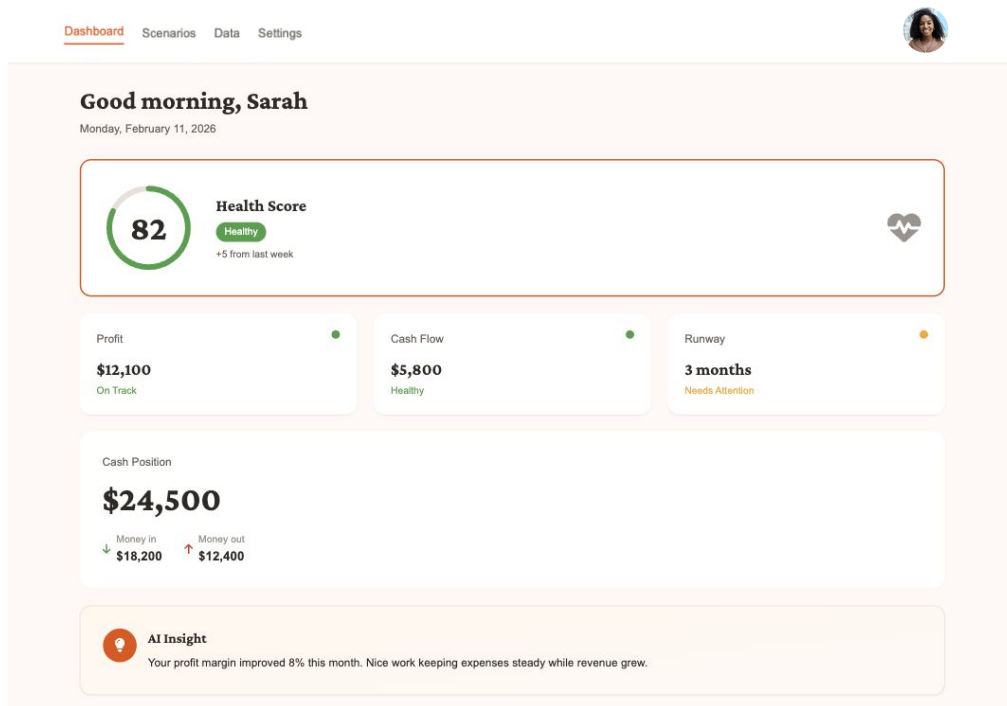

Progress, Not Perfection

Celebrate forward momentum. Users should feel empowered, not judged.

CEO Dashboard

At-a-glance business health with traffic-light indicators.

- Health Score with circular progress ring
- Traffic light indicators for Profit, Cash Flow, Runway
- Cash position card with money in/out
- Plain-English AI insight explaining what numbers mean
- Quick action: "Run a Scenario" button

09 — SCREENS

Scenario Calculator

The hero feature. What-if planning that turns numbers into decisions.

- Scenario cards: Break-Even, Goal Planning, Can I Hire?, Cash Runway
- Simple input form with sliders and number fields
- Plain-English result: "To hit your goal, you need 3 more VIP days"
- Visual comparison chart showing before/after
- Encouraging feedback: "Looks achievable!" with green indicator

The screenshot displays the 'What-If Calculator' interface. At the top, there's a navigation bar with 'Dashboard', 'Scenarios', 'Data', and 'Settings'. A user profile icon is in the top right. Below the navigation bar, the title 'What-If Calculator' is centered. On the left, there's a back arrow. On the right, there's a bookmark icon. The main content area features four scenario cards: 'Break-Even' (Calculate when you'll break even), 'Goal Planning' (Plan to reach your revenue goal), 'Can I Hire?' (See if you can afford a new hire), and 'Cash Runway' (Check how long your cash will last). The 'Can I Hire?' card is highlighted with a red border. Below these cards is a 'New Employee Details' section with input fields for 'Annual salary' (\$45,000) and 'Benefits & overhead (25%)' (\$11,250). A slider for 'When do you want to hire?' is set to '3 months from now' between 'Now' and '12 months'. At the bottom, a 'Yes, you can afford to hire!' message is shown with a green 'Achievable' indicator. Below this, a 'Profit Comparison' chart shows 'Current Monthly Profit' at \$5,800 and 'After Hiring' at \$1,100. At the very bottom, there are two buttons: 'Save Scenario' and 'Try Different Numbers'.

Dashboard Scenarios Data Settings

← What-If Calculator

Break-Even
Calculate when you'll break even

Goal Planning
Plan to reach your revenue goal

Can I Hire?
See if you can afford a new hire

Cash Runway
Check how long your cash will last

New Employee Details

Annual salary
\$ 45,000

Benefits & overhead (25%)
\$11,250

When do you want to hire?
Now 3 months from now 12 months

Yes, you can afford to hire! Achievable

Based on your current revenue of \$18,200/month and expenses of \$12,400/month, you have enough margin. Your new monthly profit would be approximately \$1,100.

Profit Comparison

Current Monthly Profit \$5,800

After Hiring \$1,100
